Electronics

- Half-wave rectifier — [./electronics/half-wave-rectifier/](/electronics/half-wave-rectifier/)
- Diode voltage doubler and quintuplicator — [./electronics/diode-voltage-doubler-and-quintuplicator/](/electronics/diode-voltage-doubler-and-quintuplicator/)
- Zener diode clipper — [./electronics/zener-diode-clipper/](/electronics/zener-diode-clipper/)
- Transistor Q-point (quiescent) test — [./electronics/transistor-q-point-quiescent-test/](/electronics/transistor-q-point-quiescent-test/)
- BJT amplifier — [./electronics/bjt-amplifier/](/electronics/bjt-amplifier/)
- Cascaded amplifier — [./electronics/cascaded-amplifier/](/electronics/cascaded-amplifier/)
- Operational amplifier — [./electronics/operational-amplifier/](/electronics/operational-amplifier/)

Measurements

- Determining instrument accuracy class: voltmeter and ammeter — [./measurements/determining-instrument-accuracy-class-voltmeter-and-ammeter/](/measurements/determining-instrument-accuracy-class-voltmeter-and-ammeter/)
- Resistance measurement by volt-ampere method: short and long connections — [./measurements/resistance-measurement-by-volt-ampere-method-short-and-long-/](/measurements/resistance-measurement-by-volt-ampere-method-short-and-long-/)
- Resistance measurement by comparison and substitution methods — [./measurements/resistance-measurement-by-comparison-and-substitution-method/](/measurements/resistance-measurement-by-comparison-and-substitution-method/)
- Resistance measurement with Wheatstone bridge — [./measurements/resistance-measurement-with-wheatstone-bridge/](/measurements/resistance-measurement-with-wheatstone-bridge/)
- Impedance measurement by three-ammeter and three-voltmeter methods — [./measurements/impedance-measurement-by-three-ammeter-and-three-voltmeter-m/](/measurements/impedance-measurement-by-three-ammeter-and-three-voltmeter-m/)
- Single-phase power measurement with wattmeter — [./measurements/single-phase-power-measurement-with-wattmeter/](/measurements/single-phase-power-measurement-with-wattmeter/)
- Three-phase power measurement in balanced three-wire systems — [./measurements/three-phase-power-measurement-in-balanced-three-wire-systems/](/measurements/three-phase-power-measurement-in-balanced-three-wire-systems/)

Logic Systems

- Logic systems — traffic lights in Proteus (optional HDL/testbench) — [./logics/logic-systems-traffic-lights-in-proteus-optional-hdl-testben/](/logics/logic-systems-traffic-lights-in-proteus-optional-hdl-testben/)

Machines

- Rankine cycle analysis: pressure/temperature variants, with/without superheat; real vs ideal efficiency; Carnot limit — [./machines/rankine-cycle-analysis-pressure-temperature-variants-with-wi/](/machines/rankine-cycle-analysis-pressure-temperature-variants-with-wi/)
- Internal combustion engines: Diesel, Otto (gasoline), and dual cycles comparison — [./machines/internal-combustion-engines-diesel-otto-gasoline-and-dual-cy/](/machines/internal-combustion-engines-diesel-otto-gasoline-and-dual-cy/)
